

## **Web Application Developer (Elixir+Phoenix LiveView)**

Weathermatic is looking for top performing developers who want challenging work that actually makes a difference in the world. Our core application is built on Ruby on Rails, but we are actively migrating to Elixir/Phoenix LiveView, and use a lot of Golang for microservices.

Hiring Contact: David Hanson (David.Hanson@weathermatic.com)

### **Primary Responsibilities**

- Help drive technology choices, balancing the use of new techniques versus maintaining existing systems in sustainable way
- Build new features in Phoenix LiveView, and migrate existing application functionality from a Ruby/Rails application
- Write scalable, well-tested code (ex\_unit, rspec, et. al.)
- AWS experience preferred but not required

### **Technologies we use:**

- Phoenix LiveView
- Ruby on Rails
- GraphQL / React Native (for mobile apps)
- Golang deployed via AWS Lambda
- Deployment via AWS Elastic Container Service (using Docker), coded & managed with Terraform
- Various other AWS services for infrastructure

### **What we are looking for...**

- Healthy appetite for learning new things – if you don't know everything in our stack, no problem, as long as you can learn!
- Demonstrated ability to adapt new solutions to existing systems
- Ability to create applications that scale
- Self-directed and able to manage your time: Get Things Done!
- Must be a great communicator
- Someone always keeping an eye on new technologies and excited about taking advantage of them

We are looking for an experience senior-level developer for this position. Full-time salary. Our office is in Garland, TX, but we primarily work remotely. Ideal candidate would be in the DFW area to be able to come into the office as needed.

### **About Weathermatic**

Weathermatic is a leading provider of water-conserving irrigation technology and services. Based in Dallas, TX, Weathermatic products have been installed in over 70 countries and in high profile properties like the U.S. Capitol Building, Pearl Harbor, Buckingham Palace and the College Football Hall of Fame. We are the leader in Smart irrigation control with more than 250,000 installations. These systems save 20-60% in landscape water on most properties.

Especially if you live in the western US, you know that drought is a serious issue and water conservation is rapidly becoming a hot button issue for businesses, governments, and individuals. Most water usage is tied to irrigation, and we build tools that can dramatically decrease water consumption and help support sustainable communities.

SmartLink is our web-based irrigation control system that is the most intuitive and affordable product in the industry; it is rapidly becoming the industry standard. <http://www.smartlinknetwork.com>. Through our Save Water, Give Life program, we donate \$1 per month for every SmartLink connection to global clean water projects. These contributions will bring safe and clean water to thousands of the world's neediest children in the coming year.

### **Compensation**

- Salaried Position
- Full benefits – medical, dental, 401k

*Weathermatic is an equal opportunity employer.*
